

Always be prepared to give an answer to everyone who asks you to give the reason for the hope that you have- 1 Peter 3:15

## LIGHTHOUSE LOOKOUT

Jesus commanded us to, “Love the Lord your God with all your heart and with all your soul and with *all your mind* and with all your strength” (Mark 12:30)

**How many of us today can say we are loving our God with that much passion?**

The United States is a nation of intellectualism with a mind for exploration and adventurism in the fields of science and technology. Yet very few Christians can say that they have a grasp on such heady concepts as nanotechnology, quantum physics, cloning, DNA analysis, bioterrorism, global politics and different religions let alone understand the philosophical implications behind them. Why is it important to understand these concepts?

These concepts are the worldview of many Christian and nonchristian people. They threaten the church and *they are not over your head*. It is our heartfelt conviction that we as Christians should have an answer and a reason for our belief in our LORD to all who ask. This includes the skeptics. We should be prepared to give an answer to the weightier philosophical questions posed by such concepts. How can we do that?

God has impressed on us that a believer-based discussion forum of such concepts is greatly needed in Grand Junction.

### Three-Point Vision

1. God has been calling us to host such a discussion forum for the believer and the skeptical nonbeliever.
2. There is a need for Christians to have fellowship with one another in the lost art of conversation and debate about the seasons of the times
3. There is a need for Christians to discover the mind of the LORD towards His people and His creation in order to know Him more fully.

In 2002 we dealt with such topics as quantum mechanics, Islam, time, early Greek thinkers, realism, idealism, deconstructionism, and linguistics as applicable to the Bible. If you are interested in discussing ideas or just listening please join us at Main Street Bagels.
